

Year of Care - Care and Support Planning Training

Supporting Practice Teams to Implement Care and support Planning

This training is aimed at GP's and Practice Nurses who are interested in implementing Care and Support Planning and are able to influence change within their practice.

It focuses on developing the ethos and skills that are at the heart of a partnership approach, using care and support planning consultation skills and supporting self management.

The overall purpose is to help participants consider the processes and skills that need to be in place to support individuals and their carers to make decisions about managing their long term conditions.

Aims of the one and a half day training:

- To understand Year of Care and Care and Support Planning
- To reflect on your own approach / philosophy of care and how this fits with Care and Support Planning
- To understand the Care and Support Planning consultation framework and the core competencies required
- To be clear about the organisational requirements for implementing Care and Support Planning in Practices

Venue: Summerfield House, Aberdeen.

Dates: Day 1 24th January 09:00 – 16:45 (light lunch provided)
Half day 21st March AM 09:00 – 13:00
